Application rates should be based on tissue or petiole analysis. On plants with waxy leaf surfaces, 12 ounces (355 mL) of a non-toxic wetting agent per 100 gallons (380 L) of finished spray will aid leaf penetration. Add Six Iron Plus 12-0-0 with 3% Mn to half of the water, then agitate while adding remaining water. Add urea or other fertilizers. Add herbicides last while continuing to agitate tank contents. Spray solution as soon as possible. Six Iron Plus 12-0-0 with 3% Mn tank mixes are generally stable; however, agitate prior to spraying if mix has been standing for over 24 hours.
