General Information

MoCa™ 5-0-5 is designed for foliar application to commercial turf and horticultural and ornamental crops to help promote robust root and shoot growth.

Rate Recommendations

Commercial Turf (such as athletic fields, greens, tees, and fairways): Apply only to actively growing turf. Use 3-6 fl.oz. per 1,000 sq.ft. in sufficient water for thorough coverage (typically 2.5 gallons). Initiate spraying prior to seasonal stress cycles. Apply at least twice monthly and allow at least 6 hours before/after irrigation event for maximum benefits.

Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rains are expected. Apply this product only to your lawn/garden. Check with your local Cooperative Extension Agency to obtain specific information on local turf best management practices.

Ornamental and Horticultural (such as flowering ornamentals, landscaping, evergreens, shrubs, trees, and palms): Mix 1-2 gallons in 100 gallons of water (or 8 fl.oz. per 2 gallons water) and spray foliage to drip. For best results, apply on a regular schedule every other week. Do not pour on roots.

Mixing and Handling Instructions

Shake well. Put 1/3 to 2/3 of total required water volume in tank. Add adjuvants, fertilizers and pesticides if desired and agitate until thoroughly mixed. Add recommended amount of this product and agitate until thoroughly mixed. Fill tank with remainder of water. Spray within 8 hours of mixing.
