

NATURAL
BLAST®

- NATURAL BLAST® is designed to reduce the organic debris that collects in water gardens and ponds.
- NATURAL BLAST® contains a proprietary blend of many different strains of natural occurring beneficial bacteria.
- NATURAL BLAST® is the perfect supplement for hard to treat stagnant pond water with high levels of floating and suspended organic compost and odor.
- What to expect with NATURAL BLAST®: assistance in the health and clarity of non-responsive ponds.

Net Contents: 60 Water Soluble Bags

113941E GHS version: 16110

NATURAL BLAST®

DIRECTIONS FOR USE

Calculate Total Gallons to be treated:

$$\text{Length} \times \text{Width} \times \text{Depth} \times 7.5 = \text{Total Gallons}$$

Each bag of Natural Blast® treats up to 83,000 gallons of water.

1. Calculate number of bags needed to treat pond:
Bags needed to treat = total gallons / 83,000.
2. Do not under treat water; over treating is safe and will yield optimal results.
3. Deploy water soluble bags of Natural Blast®, distributing evenly throughout the surface of water area (near aeration when possible). Product will disperse as packets dissolve.
4. Natural Blast® can be reapplied every 5-7 days for desired water clarity and health.
5. Dosage responses are variable.
6. Use pro-actively to reduce problems with clarity and stagnation.

APPLICATIONS

Water temperature must be over 45°F for maximum effect. Natural Blast® bags must be placed evenly throughout the treatment area. Follow directions closely. The AquaSphere® Pro must be placed in the treated pond every 30 days for continued bioremediation.

WATER MAINTENANCE

Ponds do not take care of themselves. That is why we recommend that every pond owner develop a personal Simplot Partners water management plan. Monitor your pond weekly for organic compost and odor. This allow you to identify and respond to potential problems before they start. Use Natural Blast® for quick treatment of severely contaminated and stagnant water environments.

SUPPLEMENTAL PRODUCTS

Achieve increased water clarity and improve water health naturally by using these other products:

AquaSphere® Pro, Which is the easiest maintenance product on the market; it works 24 hours a day for up to 30 days;

Rush™ for low oxygen environments as well as floating organic matter;

Vista™ for rapid response consumption of excess nutrients.

CAUTION

Do not allow the water soluble bags to come in contact with moisture. When dispersing the water soluble bags make sure that they remain dry until they are gently tossed into the pond or lake.

WARNING

Not for use in drinking water reservoirs or receptacles. Do not bring into contact with pesticides or cleaners.

STORAGE

Store in a safe, cool, and dry environment. Keep containers sealed once opened. Storage temperatures should remain under 100°F (38°C). Do not store at floor level.

This product is not considered hazardous under the Globally Harmonized System (GHS) regulations.

Rush™ and Vista™ are trademarks and AquaSphere® and Natural Blast® are registered trademarks of Bioverse.

WaterPack® and Simplot® are registered trademarks of the J.R. Simplot Company.

DISCLAIMER OF WARRANTIES

J.R. Simplot Company warrants that the composition of this product conforms to the description and is reasonably fit for the purpose as stated on the label only when used in accordance with label directions under normal conditions of use.
