(SUB)SURFACE AERATION AND DRAINAGE

SubAir Hydrowick TurfBreeze CapillaryHydroponics

SUPERIOR IN CONTROLLING AIR AND WATER ABOVE AND UNDER THE SURFACE

SubAir™ Systems, as a recognized innovator and expert in both surface and subsurface aeration as well as moisture removal systems, provides superior tools to create an optimal growing environment for healthy grass. **The SubAir™ Elite and Sport** promotes healthier and stronger playing surface by providing fresh air to the plant roots as well as removing any excessive moisture from the soil profile. **Hydrowick™** is the only drainage system that can be installed into a golf green or a sports field with minimum turf disturbance. The narrow 1 meter spacing results in a system that drains quickly using gravity drainage and wicks away excessive moisture with capillary suction. **TurfBreeze™** Fans generate all-important air movement above the surface and helps in cooling down the canopy of your turf.
