

IMPROVE TURF HEALTH & SAFETY

AIR 362

Player Safety Is The Priority.

A comprehensive approach involving field managers to the players themselves, is essential for creating a safer playing environment on grass surfaces.

IMPROVE PLAYER SAFETY

REDUCE CONCUSSIONS

REDUCE JOINT STRESS

REDUCE PLAYER INJURIES

IMPROVE TURF HEALTH

RELIEVE TURF COMPACTION & IMPROVE PERMEABILITY

IMPROVE WATER ABSORPTION

PROMOTE DEEPER ROOT GROWTH

NO DOWNTIME OR CLEAN UP

PURSUE PERFECT | FOLEYCO.COM

Campey supply market leading, innovative turf care machinery worldwide, we're continually researching new techniques and refining existing practices to help turf care professionals achieve perfection.

FOLEY AIR2G2 - 336

OFFICIAL
AIR2G2
 BY FOLEY COMPANY
 DISTRIBUTOR
 campeyturfcare.com

PRODUCT INFO	
LENGTH	88" (224cm)
WIDTH	52" (132cm) Folded 88" (224cm) Extended
HEIGHT	41" (105cm) Without Probes 58" (148cm) With Probes
ENGINE	19hp Kohler® Command Pro
AIR COMPRESSOR	2Stage Ingersoll Rand®
AIR COMPRESSOR CAPACITY	24 CFM @ 175psi
TIRES	Smooth Turf Friendly
PROBES	3
PROBE LENGTH(S)	8" (20cm) & 12" (30cm)
DRIVE	Hydrostatic
BATTERY	12 VOLT, 350 CCA
FUEL CAPACITY	6 Gallon (3.8 Liter)
OPTIONAL EQUIPMENT	
Air2HP - Handheld Probe	
Air2Go Trailer	

What AIR2G2 Can Do

The AIR2G2 operates on a unique principle of using high-pressure air to fracture compacted soil layers beneath the turf without causing surface disruption.

This technology is designed to alleviate soil compaction, improve soil structure, and enhance root growth by injecting pressurized air into the soil profile.

Key Features

Probe Injectors: Equipped with 3-probe injectors that are inserted into the ground delivering bursts of pressurized air into the soil, creating fractures and voids.

Air Compressor: The air injection process relies on a high-capacity air compressor that generates the necessary pressure to inject air into the soil.

Aeration Depth and Spacing: Operators can adjust the depth and spacing of the aeration tines based on the specific needs of the turf and soil conditions. This customization allows for targeted aeration at varying depths.

Minimal Surface Disturbance: Unlike traditional core aeration methods that remove soil plugs from the surface, the AIR2G2 minimizes surface disruption. This can lead to quicker turf recovery and reduced downtime for the playing surface.

Non-Invasive: AIR2G2's technology aims to provide aeration benefits without causing significant disruption to the turf surface. This is particularly important for maintaining high-quality playing surfaces on golf courses and sports fields.

Soil Health Benefits: By relieving soil compaction and improving soil aeration, the AIR2G2 promotes better water infiltration, nutrient absorption, and root development. This can lead to healthier turf grass and improved playing conditions.

NEW Features

LARGER MORE ACCESSIBLE ELECTRICAL BOX

ROBUST EASY TO REMOVE HOOD

REDESIGNED USER CONTROL DASHBOARD
