

MAREDO MT200 Flex-Verticutter

Flexible main frame and head suspension. The MT follows all contours and curves

High quality 2.3 mm / 0.09" Carbide tipped blades with long lifetime. Reverse rotation

Min 30 Hp
540 RPM

Total weight
350 kg
800 lb

Fully mechanical drive line. No hydraulic drive

Easy working depth adjustment
0 - 25 mm / 1"

Working width:
190 cm / 75"

Too much organic material in the top profile?

The **MAREDO** MT200 Flex-Verticutter is the solution! The special designed blades combined with the reverse rotation (rotation against driving direction) plus the high blade rpm result in perfect cutted slits with minimal surface disruption. Organic material will be removed and the surface will heal fast, making it ideal to use on greens, tees, fairways and sportfields.
