

RTS Series

General Description:

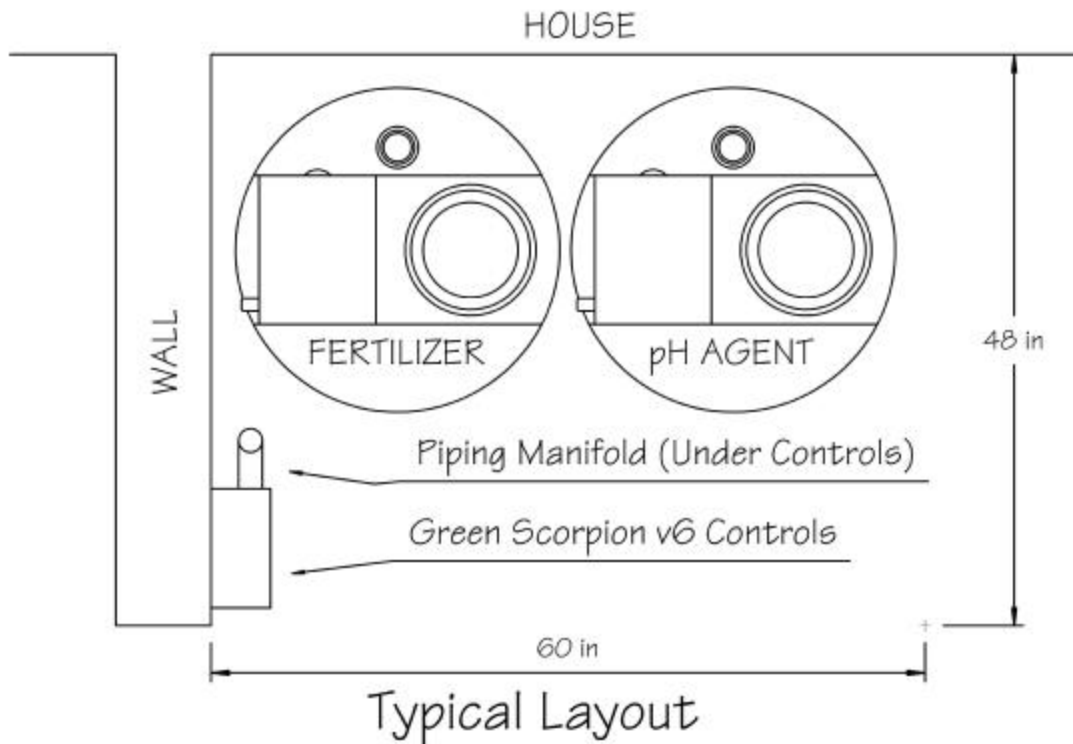

The WERECON RTS Series water treatment systems are specifically designed for homeowners who have the finest quality landscapes, and demand the best. This system features single or multi-pump fertilizer injection, as well as an optional pH control capability. It incorporates the same great quality and innovation as our industrial grade golf course systems, but at a lower cost, and designed to treat smaller volumes of water. The system includes everything you need, Injection Pumps, Tanks (62 Gallon with Secondary Containment), Flow Sensor, and Optionally, pH Sensors. Additionally, the RTS series makes use of our latest control system, the Green Scorpion 6, with unparalleled ease of use.

Features:

- Tamper proof, lockable outdoor rated pump enclosures.
- Soundproof pumps for a quiet nights sleep.
- Pre wired and plumbed for easy installation.
- Records product and water usage over time.
- Simple to operate and maintain
- Made in the USA.

WERECON Inc.

RTS Series Technical Information

Specifications

Dimensions	Variable
Pump Diaphragm	PTFE
Pump Liquid end	PVC
Seals	Viton
Check valves	Ceramic
Input Power	110-120VAC Single Phase at 10 AMP
Pump capacity	1.3 or 2.3 GPH
Pressure max.	150 PSI
Tank Material	Crosslinked Polyethylene
Tank Capacity	62 US Gallons

Pre wired power cordset for standard 120VAC Outlet.
